High beams not working? TDI 101 ... One failed bulb will cause both not to work. Also, sometimes the filament will break and then flop around and make a connection, work again, fail again, etc. since they are the cheapest and easiest to rule out I would pull them out and visually inspect the filaments inside.

The cam position sensor is critical to the proper functioning of the engine management system in its timing of engine events. The sensor delivers information on the position of the camshaft that actuates the engine's intake valves to the computer, which uses that information to deliver fuel and spark at the correct time.
